- ▶ Defense from spear-phishing, ransomware, and attacks.
- ▶ Configurable email security administration tools
- ▶ High level of security with email encryption
- ▶ Send and receive large file attachments

EMAIL GUARDIAN®

Avoid compliance issues and send confidential data with confidence. Get EmailGuardian® from Access Business Technologies and experience true user-to-user encryption

Considering the frequent data breaches affecting every industry, the mortgage business is also facing increased regulations and requirements to protect customer data. But meeting minimum standards won't win new customers, especially when finances are in the balance. Let ABT take your security needs and exceed them with archiving solutions that ensure you stay compliant with a industry-leading multi layered email protection service that just makes sense.

Keep your inbox clean

Ransomware, malware and viruses can creep into your organization via email, drain productivity and cost you millions. Identify spam and determine whether domains embedded within emails lead to known spam or malware sites. EmailGuardian® blocks 99 percent of spam and viruses, keeping your inbox clean and your network safe.

Your email all of the time

How long can your business go without email? Email continuity gives you access to email via any device, even when your own servers go offline. We guarantee a 99.9% uptime so you can close more loans.

Don't worry about compliance

Store your business records securely and retrieve them easily with archiving and eDiscovery solutions. Maintain an easily accessible archive of messages and documents that can be searched, verified and audited. EmailGuardian® provides secure, long-term storage that can save you time, money and potential compliance issues.

It's your data, keep it that way

Data loss prevention can be configured on three levels, similar to how encryption is configured: at gateway level, at domain level and at individual user level. The latter is useful in specific cases where some users can send out information via email that other users cannot.

About ABT:

Access Business Technologies, headquartered in Northern California, was founded in 1999 as a leading provider of hosted, on-demand software for mortgage loan origination, servicing and pipeline management. Access Business Technologies (ABT) provides access to business technologies that empower mortgage professionals to safely perform at the top of their game anytime, anywhere. ABT proactively supports, defends and manages game-changing technologies and processes that help mortgage professionals excel.
